Plug & play under-seat subwoofer for select BMW vehicles.

The Harman/Kardon Flow 80 subwoofer delivers true, accurate and powerful bass performance thanks to its space saving inverted acoustic structure and powerful neodymium magnet motor with a large 2-inch voice coil. Designed to integrate flawlessly and equipped with a BMW-Specific mounting chassis and plug-and-play connector for a direct fit into select BMW models underneath the front seat. Plus, it also can be used to enhance bass performance in luxury Audi, Porsche vehicles. Keeping with Harman/Kardon's clean design language, the silhouette of the speaker is a simple circle. The fabric-wrapped grill is reminiscent of other Harman/Kardon speakers and protects the cone from falling debris. The front magnet creates the illusion of pushing the cloth grill into the speaker. The magnet's metal grill uses the iconic Harman/Kardon 60-degree slash pattern, based on the "/" in Harman/Kardon, which provides venting for peak performance.

Features

- ▶ Inverted Acoustic Structure
- ▶ Neodymium Magnetic Motor
- ▶ 2" (50mm) Voice Coil Wound on TIL (Glass Fiber) Former
- ▶ BMW-specific Chassis with Plug-and-play Connector is Included
- ▶ Harman/Kardon's Clean Aesthetic Design

Features and Benefits

Inverted Acoustic Structure

Flow 80 utilizes an inverted space saving acoustic structure to achieve maximum excursion in shallow mount applications, while still reproducing powerful and accurate low frequencies.

Neodymium Magnetic Motor

Neodymium magnets deliver up to 20 times the magnetic field per unit volume compared to Ferrite magnet to maximize performance while minimizing bulk and weight.

2" (50mm) Voice Coil Wound on TIL (Glass Fiber) Former

Flow 80 is engineered with a 2" voice coil with a high temperature resistant TIL (Glass Fiber) former for exceptional power dissipation and stability.

BMW-specific Chassis with Plug-and-play Connector is Included

Flow 80 is supplied with a BMW-specific chassis and plug-and-play connector, which allows a "direct replacement" and makes for quick and easy installation of the select BMW models underneath the front seats.

Harman/Kardon's Clean Aesthetic Design

Flow 80 keeps with Harman/Kardon's clean aesthetic, the silhouette of the speaker is a simple circle. The fabric-wrapped grill, reminiscent of other Harman/Kardon speakers, protects the cone from fallen debris under the seat. The front magnet creates the illusion of pushing the cloth grill into the speaker. The magnet's metal grill uses the iconic Harman/Kardon 60-degree slash pattern, based on the "H" in Harman/Kardon, which provides venting for peak performance.

Technical Specifications

General specifications

- Subwoofer: 8" Polypropylene Driver
- Power Handling: 125W RMS, 375W peak
- Sensitivity (1m/1w): 85dB
- Frequency Response (-6dB): 45Hz - 1kHz
- Nominal Impedance: 4 ohms
- Voice Coil Diameter: 2" (50mm)
- Mounting Depth: 1-11/16" (43mm)
- Cutout Hole: 7-3/16" (182.2mm)

What's in the box

- 1x Subwoofer
- 1x BMW-specific chassis with plug-and-play connector
- 1x Subwoofer cushion (EVA)
- 1x BMW-specific chassis cushion (EVA)
- 4x Screws
- 1x QSG
